## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 1-11, and 13-24 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/10/06.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fujiwara (5455647) in view of Nakahara (6263164).

Fujiwara shows an angle detection apparatus that includes a distance measuring part (column 6 line 40-50), and an inclination angle calculation part (column 5-6). However Fujiwara does not show a judgement part.

Nakahara teaches a similar apparatus that does include a judgement part for judging the existence of reliability of the distances. It would have been obvious to include the judgement part taught by Nakahara to lessen the possibility of an erroneous measurement.
